PUBLIC AND POPULATION HEALTH LEADERSHIP CONCENTRATION

This program is a comprehensive approach that provides an understanding of public health practices. Upon completion of a Public Health Concentration, the student will be able to:

- Demonstrate knowledge of public health topics
- Demonstrate an understanding of scientific method, data analysis, and empirical inquiry
- Apply advanced skills to access, synthesize and interpret relevant literature
- Apply their knowledge toward the successful implementation of a capstone project focused on public health
- Show proficiency in written and oral communication of the application of public health topics
