# **PCOM GEORGIA**

### **PCOM Georgia Focus**

The primary focus of PCOM Georgia is to recruit and educate students from Georgia and the surrounding states. PCOM Georgia seeks to retain graduate osteopathic medicine physicians, pharmacists, physical therapists, biomedical scientists, medical laboratory scientists, and other healthcare professionals in the Southeast to serve the health needs of the region and to advance the healthcare professions. PCOM Georgia encourages graduates to serve where the need is greatest - inner cities and rural areas with severe physician shortages.

## **PCOM Georgia Facilities**

PCOM Georgia is a campus designed with student learning, cuttingedge instructional technology and social interaction at the forefront. The campus occupies 20 acres in the northern Atlanta suburb of Suwanee, which has been featured on Kiplinger and Money magazines' best cities lists

The campus facility is uniquely and conveniently housed in a modern 150,000-square foot building. Its design includes two architectural main focal points that take advantage of natural light through the use of skylights and partitions. In 2012 PCOM acquired an adjacent building at 2601 Northlake Drive, and this facility now houses academic support staff and the Physician Assistant Program.

In addition to large and small classrooms, conference areas and study spaces, PCOM Georgia instructional space includes a large anatomy laboratory, the osteopathic manipulative medicine teaching laboratory and the clinical learning and assessment center. In addition, the facility houses biomedical science and pharmacy research and multiuse laboratories, three pharmacy practice labs and an osteopathic manipulative patient care unit.

Open circulation areas facilitate social interaction and ease of access to student services, learning resources and instructional spaces. Student life services also include a central dining area, student lounge, game room and fitness facility. A central feature of the PCOM Georgia campus is the Information Commons, where students have access to both print and electronic media.

PCOM Georgia's facility offers state-of-the-art technology to enhance learning experiences for students. The campus emphasizes substantial use of computer technology that includes a wireless network, digital video and distance learning capability, digital medical and pharmaceutical libraries, and many databases for research and review.
